Attn: Jane C. Henney, M.D. FEB 26 AIO:39

My husband and I are deeply concerned about the proliferation of genetically engineered products in our food supply. We urge you to use your authority and influence to implement the following governmental actions immediately to protect the public and our environment:

- (1) Full and accurate labeling of all genetically engineered foods and food ingredients, giving consumers the right to know what they are eating;
- (2) Stringent, independent, and long-term testing of all genetically engineered products before they are released into the environment;

11-21-00

Jane C. Henney, M.D.

Pg. 2

- (3) United States leadership in implementing worldwide, scientifically credible regulation of all genetic engineering activities;
- (4) adoption of legislation to hold the makers of gene-altered products fully liable for any harm or unforeseen consequences caused by their products;
- (5) a moratorium on the introduction of any new genetically engineered organisms until the above actions are taken.
