

Dear FDA,  
I am writing to express my opposition to the FDA's new proposed rule and guidance on genetically engineered (GE) foods. The agency's voluntary labelling and notification proposals are totally inadequate to protect human health, the environment, and my right to know. I fully support the following:

- All GE foods and food ingredients should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be safe and should be subject to mandatory premarket safety testing.
- There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment

The fact that U.S. citizens  
have to request a moratorium  
on Gene Healthly engineered  
foods until long term  
studies show that they are  
safe for human health &  
the environment is an  
outrage. I assumed (took  
it for granted) that the  
FDA would do this. Are  
corporations also controlling  
your agenda? Ann T. Lang
