

Feb. 28, 2001

To the FDA;

I and my family are ^{0332 '01 MAR -7 1957} opposed to the FDA's new proposed rule on genetically engineered foods. If you are so sure there is no danger of sickness or adverse biological reaction to GE foods, then LABEL them. Let all of those people who feel there is no health risk, buy and eat these foods. Let those people who feel their health is at risk, make the decision themselves whether to eat GE foods.

GIVE US THE DAD GUM CHOICE !!

- All GE foods should be labelled to provide citizens a choice
- GE foods cannot be assumed completely safe for all people. We have science. We have the ability to test. JUST DO IT.
