

Dear FDA, [Docket # 00D-1598
OCN-1396] ~~Feb~~ March 5, 2001

As a physician, I remain
very concerned re: the informed
consent of the American public
for genetically altered foods.
People need to understand the full
ramifications of what goes into
their food, and the evidence is
piling on the possible effects of
genetically altered food on health.

Paul Chan M.D.
