

Dear DA~

3/13/61

I am opposed to FDA's approach to generally
engineered GE foods. Voluntary labeling and
notification are inadequate to protect my health.
All GE foods should be labeled as shown above.
This includes food ingredients also.
GE foods should be required to ~~show~~ show the nutrient
testing.
No GE foods should be marketed without long
term studies showing they are safe for human
health & the environment. Thank you.
