Hey Bubba!

You're supposed to protect the consumer not big business! We want to know which food we purchase is G-E & which is not! It's our right, & you want to prevent non G-E suppliers from telling us that their products are NON-G-E. Please that implies Monsanto & others have inferior product. I have one word for that BULLSHIT! Your notification reply is an insult to consumers & science. Surely there are problems - Toes shell recall & Monarch butterfly - or don't your dad?

FDA must require pre-market testing & environmental review as well as mandatory labeling. If you don't we shall start a food rebellion. If you like G-E food & think it's safe - eat -
