

Dear FDA Commissioner,

I am writing to express my opposition to FDA's proposed ~~to regulate~~ ~~guidance~~ on genetically engineered (GE) foods. We oppose the agency's voluntary labeling and notification proposals in support of all the points in the citizen's petition currently before the agency (docket No. OON-1396, and 00D-1598).

- All GE foods should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing
- There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

(Additional Personal Comments:)

Voluntary labeling does not solve any of the problems of genetic engineering - the corporations must be publicly accountable for their actions
