If you know that your muscles recover slowly...

Citrudex™

> **Helps removal of ammonia**
 Muscular activity is associated with the production of ammonia and the feeling of fatigue. The levels of ammonia should be maintained within a narrow range to avoid an accumulation in blood and brain. Citrudex facilitates the removal of ammonia by accelerating the urea cycle in the liver.

> Promotes faster recovery

The active ingredient in Citrudex elevates body levels of citrulline to enhance natural mechanisms of recovery from muscular weakness.
