Re: Docket # 98P-0151 / CPI

Dear Sir / Madam:

I am writing concerning Docket # 98P-0151 / CPI

It has come to my attention that downed cows are being used for food for the Nat'l School Lunch Program. Not only is this an unacceptable practice but it also makes me feel very distressed to think that this meat is given to children who are our most valuable natural resource. These animals are so sick and may have diseases that then our children get and then the disease can spread to both other children as well as adults.

Why are we risking this?

This practice is also very inhumane to the cow who gets dragged to its death to the slaughter house and must be stopped for the benefit of us all.

98P-0151
