

I am writing to **express** my opposition to the FDA's new proposed rule **and** guidance on **genetically** engineered (**GE**) foods. The agency's voluntary **labeling** and notification **proposals** are **totally** inadequate **to** protect human health, the environment, and my right to know. I fully support the **following**:

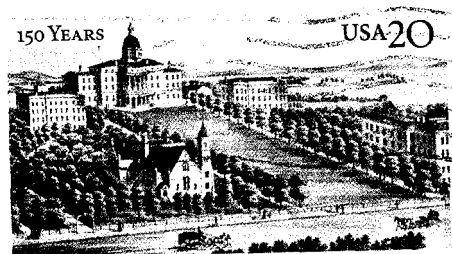

- All GE foods and food ingredients should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be safe and should be subject to mandatory pre-market safety testing.
- There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.
