

DEAR FDA, *Get real*

I am writing to express my opposition to the FDA's new proposed rule and guidance on genetically engineered (GE) foods. The agency's voluntary labeling and notification proposals are totally inadequate to protect human health, the environment, and my right to know. I fully support the following:

- All GE foods and food ingredients should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be safe and should be subject to mandatory pre-market safety testing.
- There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

Mar 5-

Dear FDA,

I have let my Congressman know that food safety is #1 (for me & my family) priority for \$ spending. Please do a better job. (of all you do). Fisheries, seafoods, grains all need your 21 century vigilance. Please re-direct your energy and policy to current cautions for human consumption and environmental balance. Detailed food labeling is an optimum way to healthy living (aka food safety)

**TO THE FDA BY APRIL 3RD!**
