

3/5/01

Dear FDA Commissioner,

Re docket 000-1598 & 00N-1396, I can't believe you are risking the health of the American people by refusing to require labeling and pre-market safety testing of GMO products! Europe, Japan and other countries will not allow such risky foods into their markets, yet you do nothing to protect U.S. citizens from the dangers posed by genetically engineered food. The human consequences of such policies are unthinkable - let that be on your conscience, if you do not do your job as you should. Jenyn Bauer

00N-1396
