

FDA-
Management Branch
(HFA-305)

I am writing this letter concerning the labeling of biotech ingredients on our food and the ruling against requiring food manufacturers to label products that are genetically engineered.

I feel that the FDA has failed to protect the public from credible and significant health and environmental risks, and has denied Americans the right to be informed about the food we eat and feed to our children.

I have a one year old son. Is he destined to eating a lifetime of

genetically modified organisms,
without so much as a warning?

I don't appreciate the
FDA gambling with my
son's life and health -

Thank You -
