

Dear Commissioner Henney, ^{26 Jan '01} Re GE Foods

I urge you to support a legal petition by the Center for Food Safety to see ¹ that no new genetically engineered foods or products be released until the FDA requires long-term safety testing of all GE foods before they get to market.

² also to see that all GE foods presently on market be labeled, giving consumers the right to know what is in the food we are eating. These GE foods can wreak havoc with our health otherwise.

Sincerely, Eleanor G. Brigden
