

Having problems watching all your favorite cable channels while you're on the go?

**INTRODUCING A BETTER WAY:
"LETSGO TV"**

The TV set you're looking at here weighs two pounds and has the largest viewing screen of any hand-held TV in the world.

More important, LetsGo TV allows you to bring all your favorite cable TV channels into the great outdoors. Watch them at the beach, on the golf course, at an outdoor concert, or sitting in a tree. A powerful antenna picks up satellite signals, then delivers a picture so clear, so sharp - you'll think you're there - except you won't be.

**Big breakthrough.
Small price.**

You can subscribe to LetsGo TV for just \$49.95 a month. That's probably about what you're paying now to sit at home and watch your favorite cable stations. The hand-held TV receiver, with antenna, will cost you \$498. However, subscribe to our service for one year, and you'll receive a mail-in rebate of \$200, reducing the actual cost of your TV to \$298.

Our ever-vigilant lawyers have asked us to tell you that LetsGo TV is for outdoor use only and that terminating your contract within the twelve-month period will void the rebate and require a cancellation fee of \$50. But frankly, we think you'll be too busy enjoying this product to think about terminating anything.

How do I order? Call 1-800-LETSGOTV. Or subscribe online at www.letsgotv.com. It doesn't get any simpler than that.
