Redact

The AG's letter misrepresents the conclusions of the Climate Action Report (CAR), claiming that the CAR calls for mandatory reductions of

Release

greenhouse gas

emissions. In fact, the Report reinforces that the President's policy is appropriately calibrated to the current state of scientific knowledge by confirming the major gaps in our current understanding of global climate change. The AG's letter is replete with oversimplifications and

inaccurate

representations of the CAR's conclusions on this key point. The CAR's conclusions regarding the remaining uncertainties in climate change

science

are also supported by the most recent findings of the National Academy

of

Sciences.
