TEXT:  
Phil,

IEA periodically publishes reviews of member countries' climate activities. They contacted my office to update the USG list. In year's past, we have given them the annual OMB Climate Report to Congress, which is the most comprehensive review of the many things the Feds do on climate. I am unable to find anyone who knows the status of the 03 OMB report - can you help? Alternatively, was there a climate change crosscut done for the '04 budget? That would at least list the programs in USDA, EPA, DOE, DOI, etc. If the OMB report or crosscut is not available soon, can you direct me to a document that you think fully characterizes the breath of US climate programs? The CAR is, in my opinion out of date. My view is that we have to provide them with something and its a good opportunity to tell IEA members what we are spending the billions on. Thanks, Phil.
