TEXT:

I am reading this book, and it is very, very informative - on the science
 of
 climate change, what we know, what we don't know. I have been to

presentations by Ross McKittrick, an economist, on various policies for limiting ghg emissions, and he is very smart and insightful. I strongly recommend this briefing to you if you would like to gain a fuller and better understanding of the science of climate change and economics of various proposed policies. If you are able to attend, please rsvp to mebell@cei.org.
