

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

January 4, 2007

SECRETARY

COMMISSION VOTING RECORD

DECISION ITEM: SECY-06-0234

TITLE: FINAL RULE: SECURE TRANSFER OF NUCLEAR  
MATERIAL (RIN 3150-AH90)

The Commission (with all Commissioners agreeing) approved the subject paper as noted in an Affirmation Session and recorded in the Staff Requirements Memorandum (SRM) of January 4, 2007.

This Record contains a summary of voting on this matter together with the individual vote sheets, views and comments of the Commission.

A handwritten signature in black ink, appearing to read "Annette L. Vietti-Cook", written over a horizontal line.

Annette L. Vietti-Cook  
Secretary of the Commission

**Commissioner Jaczko's Comments on SECY-06-0234  
Final Rule: Secure Transfer of Nuclear Material (RIN 3150-AH90)**

I approve of the staff's recommendation to publish the final rule for the secure transfer of nuclear materials in the *Federal Register*. The publication of this rulemaking implements Section 656, Secure Transfer of Nuclear Material, of the Energy Policy Act (EPAc) of 2005, which directed the Nuclear Regulatory Commission (NRC) to establish a system of manifests and security background checks for any party pursuant to and NRC import or export license. This action completes one of the many actions currently underway by the NRC to implement the new authorities given to it under the EPAc.

The regulation, in its current form, only applies to licensees who receive an Order from the NRC requiring the completion of security background checks as a prerequisite for unescorted access to risk significant radioactive materials. The Commission, prior to the development of this rule, directed the staff to Order manufacturers and distributors, and pool type irradiator licensees to restrict access to risk-significant materials based on fingerprinting and criminal history record checks. Additionally, Orders were sent to licensees who ship radioactive material quantities of concern.

The new statutory responsibilities of the NRC under Section 656 covered a range of materials such as spent nuclear fuel, source and special nuclear materials, radioactive waste, as well as byproduct materials. As a result, I believe a wider range of licensees should be required to receive Orders from the NRC under this new regulation to restrict access to these materials if they are risk significant. I understand, however, that the staff is preparing a paper that includes its recommendations for issuing additional Orders, as appropriate. Thus, I will withhold further comment on this issue until I see the staff's recommendations in the aforementioned paper.
