Commissioner Comments on SECY-03-0149

Chairman Diaz

The ACMUI has provided and continues to provide the Commission with valuable advice on the medical use of isotopes. I personally find that the Committee is of great use and provides necessary expertise to the Agency. I do agree that there are occasions when consultations with ACMUI on our medical regulations are appropriate, e.g., to determine whether an individual meets our training and experience requirements, or whether an exemption should be granted to the requirement for who should be physically present during a medical procedure. The staff should limit these consultations to specific regulatory needs.
