### **Community Advisory Board For Nevada Test Site Programs Is Conducting Its 2008 Membership Recruitment Drive**

The Community Advisory Board for the Nevada Test Site Programs (CAB) is currently conducting its 2008 membership recruitment drive. If you are interested in working with your neighbors to make a difference in addressing environmental management activities at the Nevada Test Site, please consider applying for membership now.

The CAB is a federally-chartered U.S. Department of Energy (DOE) advisory board made up of citizen volunteers from urban and rural communities in Southern Nevada. CAB members meet bi-monthly to study and discuss environmental activities that take place at the Nevada Test Site and provide recommendations to the DOE Nevada Site Office Environmental Management Program. The CAB is chartered to review and provide feedback on radioactive waste management/disposal and transportation activities, the effects of historic nuclear testing on the groundwater at the Nevada Test Site, and other environmental remediation activities. However, the Board does not address issues related to DOE's Yucca Mountain Project.

No related training or experience is required. To learn more, call (702) 657-9088, or visit the CAB Website at [www.ntscab.com](http://www.ntscab.com).
