DIVINE STRAKE

DRAFT December 2006 Revised Environmental Assessment Re-Posted; Comment Period Extended due to Inadvertent Omission of 10 Pages

The National Nuclear Security Administration has discovered that Chapters 5 – 7 (Agencies and Persons Consulted (5.0), Definition of Technical Terms (6.0) and References (7.0)), a total of ten pages, were inadvertently omitted from the document released on December 22, 2006, entitled, “DRAFT December 2006 Revised Environmental Assessment, *Large-Scale, Open-Air Explosive Detonation, DIVINE STRAKE, at the Nevada Test Site*” (“DRAFT December Revised EA”).

As a result of this inadvertent omission, NNSA has decided to immediately distribute the missing chapters to stakeholders who received hard copies of the document. In addition, NNSA has removed the incomplete electronic image of the DRAFT December Revised EA from the NNSA Nevada Site Office website at www.nv.doe.gov and replaced it with an image of the complete document. NNSA apologizes for any inconvenience this inadvertent error may have caused.

To allow for the originally intended time for stakeholder review of the entire document (inclusive of the remaining pages), the deadline for submission of comments has been extended to close of business on February 7, 2007.

Comments can be submitted in a number of ways.
