

## Jordan

### *Update on Progress*

- ★ In April 2008, Jordan completed a constraints analysis and a sector analysis that highlighted key challenges to long-term, sustainable economic growth in Jordan.
- ★ In April and May, Jordan conducted a broad, participatory consultative process that included town hall meetings in each of the country's twelve governorates. This process provided opportunities for a cross section of citizens, civil society organizations and the private sector to share issues, concerns, and potential investment ideas.
- ★ In line with a clear national development priority, the constraints analysis, sector analysis and consultative process identified the availability of water as a constraint to economic growth. In July, Jordan hosted a broad stakeholder workshop to identify key problems that might be addressed by an MCC investment in the water sector.
- ★ Based on the workshop results, Jordan is developing concept papers that propose potential projects focused on reducing non-revenue water and increasing wastewater treatment and reuse.
- ★ Since early 2007, Jordan's Threshold Program has been advancing customs reform and improvements in municipal governance. The on-going program is managed by USAID.

#### Compact Status

Status .....Compact Eligible

#### Country Information

Population .....5,600,000\*

GNI Per Capita .....\$2850\*

#### Compact Process
