How would you like to learn about:

The Nevada Test Site

National Security

Environmental Management

and many other fascinating topics?

Now you can!

The U.S. Department of Energy's National Nuclear Security Administration Nevada Site Office provides a Speakers Bureau as a public service to the community, civic, and school groups to learn about Nevada Test Site programs and activities. The Nevada Test Site, with its unique 50 plus-year history unlike any place in the United States, is of great interest to young and old.

The original mission of nuclear weapons testing has given way to supporting national security through a variety of physics experiments. Today, the expanded Nevada Test Site mission includes maintaining test readiness, remediation of past nuclear sites, and the development of new technology to assist in that work.

Schedule a speaker

A variety of topics are available to meet the needs of your group or organization. To schedule a speaker, or for more information, please contact:

Popular topics

National Security

Site representatives provide an overview of experimentation at the Nevada Test Site that support our nation's national security missions.

Speakers are available to discuss the Nevada Test Site's role in Homeland Security activities and weapons of mass destruction training for first responders.

Nevada Test Site History

Speakers provide an in-depth look at the 50 plus-year history the site played to help win the Cold War.

Environmental Management

Experts illustrate how environmental issues that are a result of past testing activities are addressed. This includes groundwater characterization, remediation activities, radioactive waste management, and related topics.

Subject Matter Experts

Engineers, scientists, geologists, and industrial hygienists are just a few of the skilled professionals available

to speak about a wide variety of topics. From the basics of radiation, to test site geology, to women in government, there is a speaker to cover the topic you request.
