applicable agency policies including safety. Operator qualifications can be found in the 310-1 Wildland Fire Qualification System Guide on the National Wildfire Coordinating Group website at: <u>http://www.nwcg.gov/pms/docs/PMS310-1.pdf</u> In circumstances where preseason EERA's have been exhausted and an "at incident" EERA is necessary, the MOH identified below is the preferred MOH. Commercial practices should be used if they are deemed more appropriate except for equipment required to be solicited competitively\*. Each Geographic Area shall use these methods of hire when developing standard rates published in Chapter 20 supplements to the Interagency Incident Business Management Handbook. Preseason EERA's, competitive or otherwise, shall use the method of hire (MOH) identified in this list. This list is not meant to be all-inclusive in equipment specifications and typing. Equipment must conform to the specifications developed by the equipment committee and adhere to any
