Artificial Intelligence

Automating tasks that have required human intelligence ...and beyond.

- Representation & reasoning with knowledge
- Sensing, learning & adaptation
- Search & optimization
- Theoretical principles & applications
- Embedded vs. foreground; real-time vs. offline; autonomous vs. supportive, interactive.

Evolution of Subdisciplines Uncertain Decision **Machine** Reasoning **Making** Learning & Logic **Datamining Diagnosis Planning** Qualitative **Distributed** Reasoning AI **Artificial** Metareasoning Intelligence **Real-Time** & Control Reasoning **Temporal** Search Reasoning Knowledge Representation **Pationality** Constraint Cognitive Satisfaction Science

Evolution of Specialty Areas

Al at Forefront of "Computational Revolution"

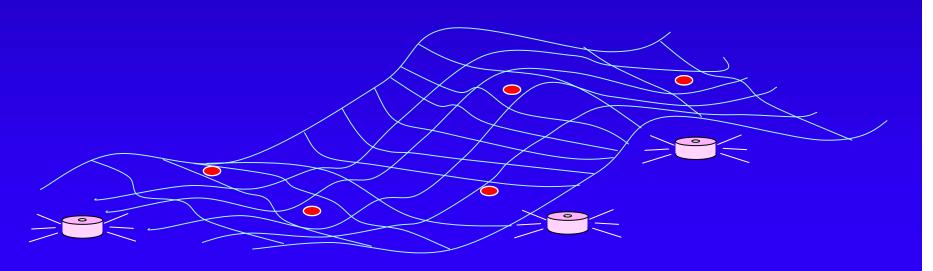

Industrial revolution

Computational revolution

Acceleration of Methods, Applications, Infrastructure

- **†** Learning and reasoning prowess
- **†** Computation
- **Memory**
- **†** Sensors, connectivity, and content

Expectations: Al in daily life

- **Communications**
- > Time management
- Health & safety
- **Education**
- Goals, informational needs
- > Games, recreation, activities
- Products, purchases, marketing
- Opportunistic planning
- Augmentation of cognition

Expectations: Al in Science

- Automated discovery
- Design of experiments
- > Triaging of resources
- Interpretation of data
- Probing complexity
- Biology, chemistry, medicine, climate

Key insights and technological breakthroughs will be enabled through Al methods

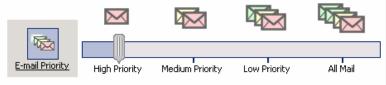

Expectation: Al and Infrastructure

- > Transportation
- Commerce decision making
- Agriculture
- > Engineering & architecture
- Power & conservation

Al and the Consumer

- Evolving relationship with computation
- Sensing, reasoning & learning
- Personalized smart applications
- Products & services
- Challenges and opportunities with data & privacy

-Triage of alerts & messages

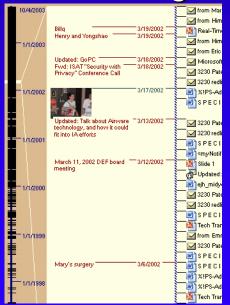

-Predictive, proactive services

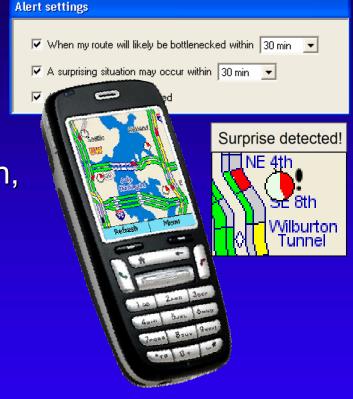

-Rich visualizations of inferences

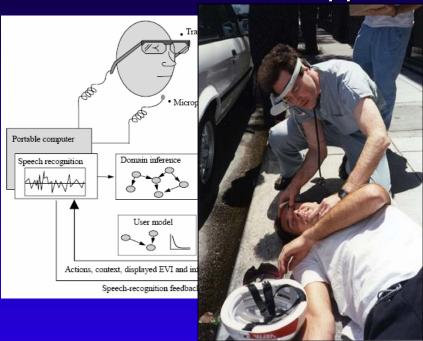

-Memory, search, reminding

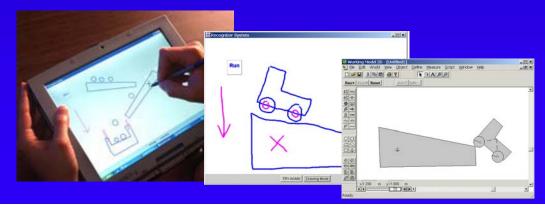

- Handsfree decision support

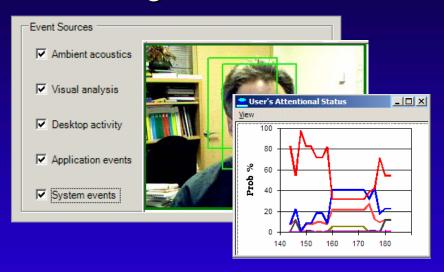

- Natural interaction methods

- Mobile search & retrieval

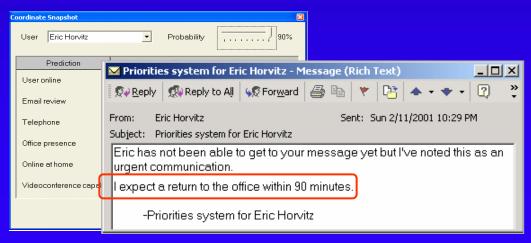

- Reasoning about attention

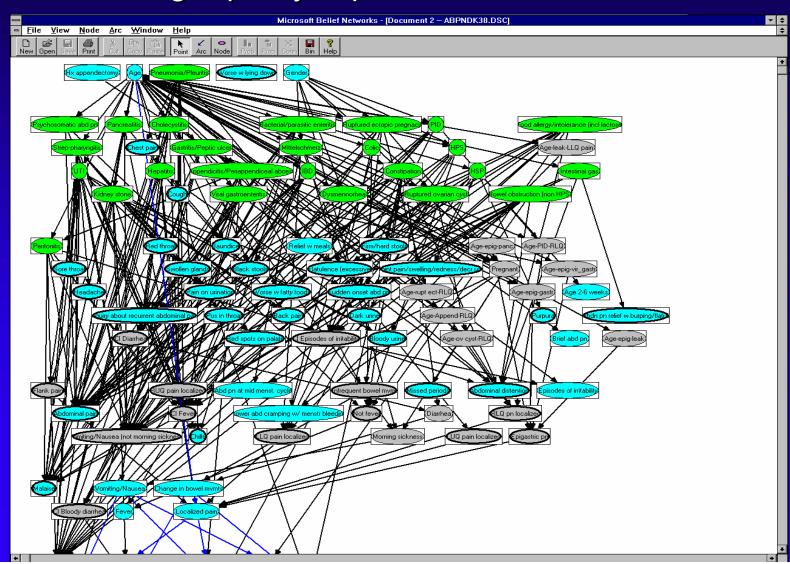

- Facilitating & arranging communications

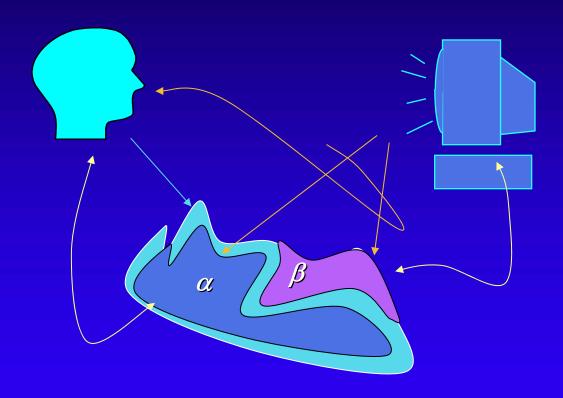

- Presence forecasting

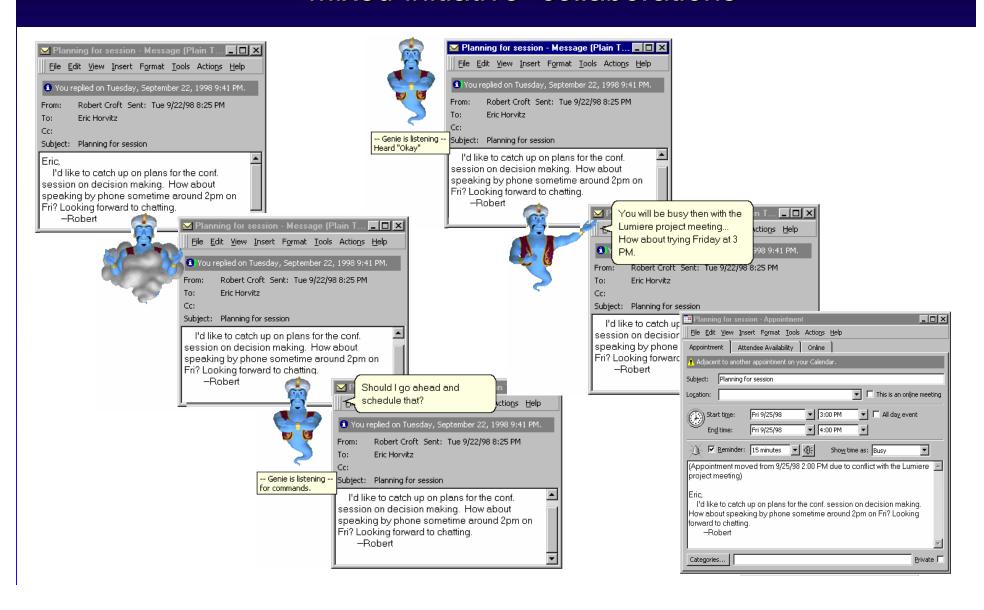

- Shift of high-quality expertise and services to consumer

- "Mixed-initiative" collaborations

- "Mixed-initiative" collaborations

Trends in sensing, reasoning & learning

 Large quantities of data via new sensing and online processes

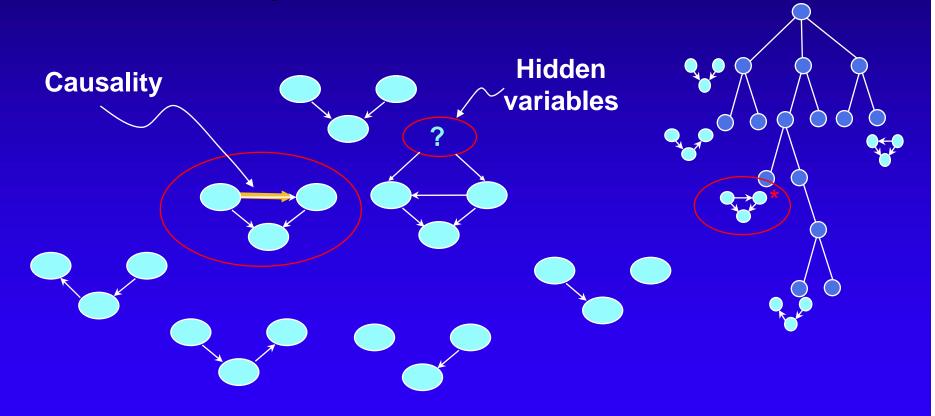

Advances in tractable machine learning

→ New applications and services

Privacy challenges & opportunities

Advances in Machine Learning

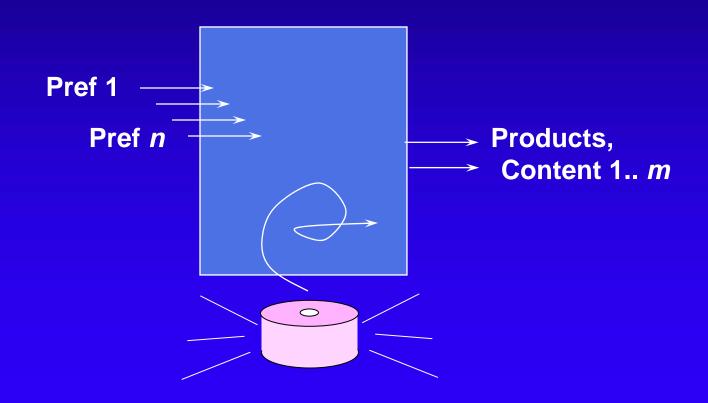

- e.g., Structure search over variables
- Generate and test feasible models
- Build predictive models

Playing an increasing role in the sciences

Proliferation of "Preference Machines"

Example: Collaborative Filtering

Proliferation of Preference Machines

Recommended for you

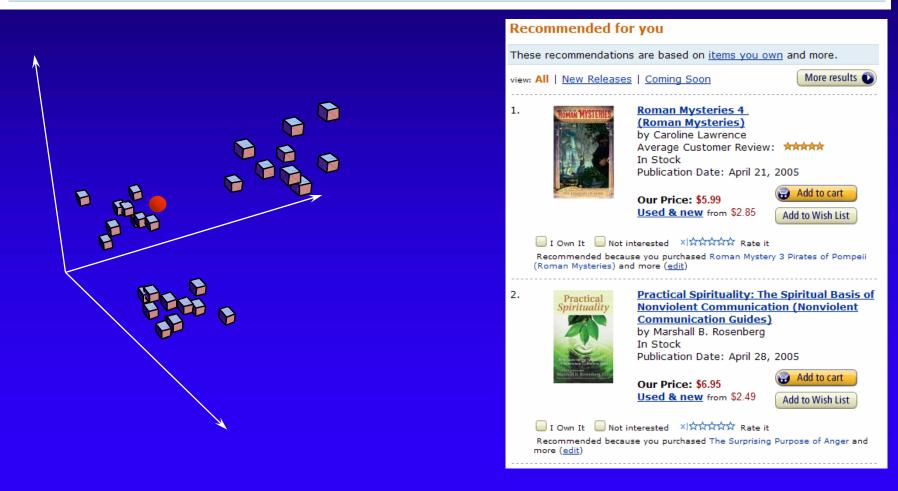

These recommendations are based on items you own and more.

Proliferation of Preference Machines

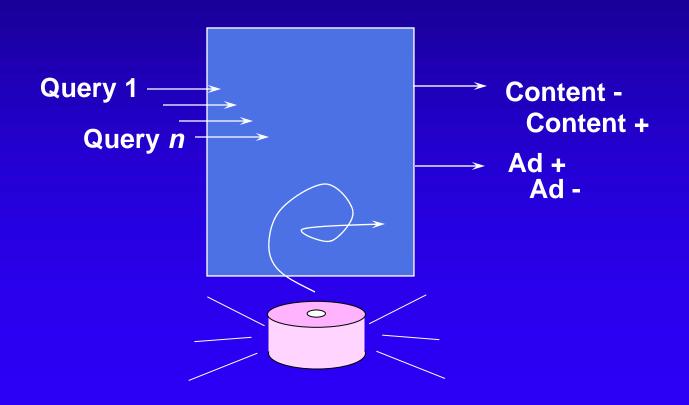

Recommended for you

These recommendations are based on items you own and more.

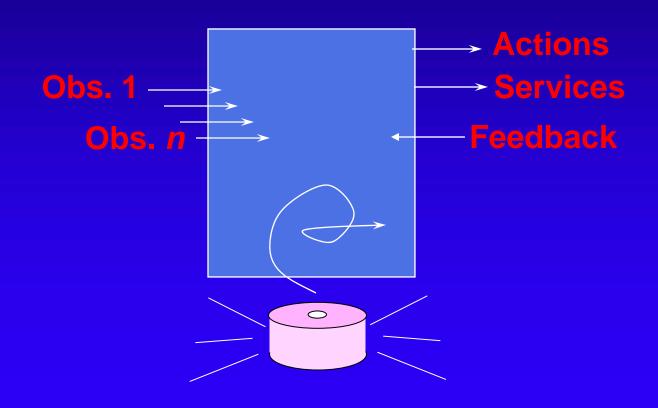

Proliferation of "Intention Machines"

Example: Web search

Proliferation of "Intention Machines"

Beyond search... multiple services

Geocentric Services

Example: Predestination Project

Sensing, Learning, and Privacy Privacy challenges ...and opportunities

- Protected sensing & personalization
- Learning preferences about privacy
- Proactive inference & modeling
- Enriched parameters & policies for data sharing
- Restricted usage
- Partial revelation

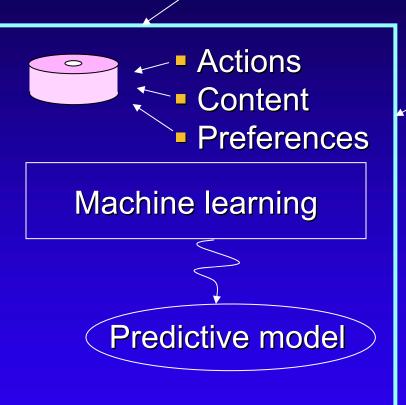

Sensing, Learning, and Privacy Privacy challenges ...and opportunities

- Protected sensing & personalization
 - Local sensing, learning, and inferencing within privacy of users' systems
 - Design of services that share nothing or little externally

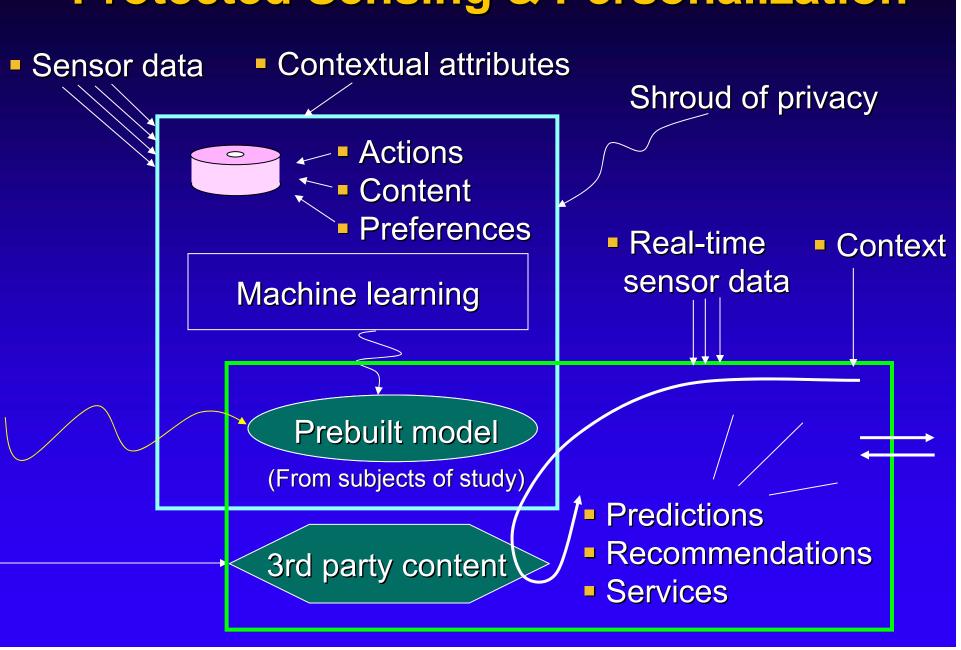

Protected Sensing & Personalization

Sensor dataContextual attributes

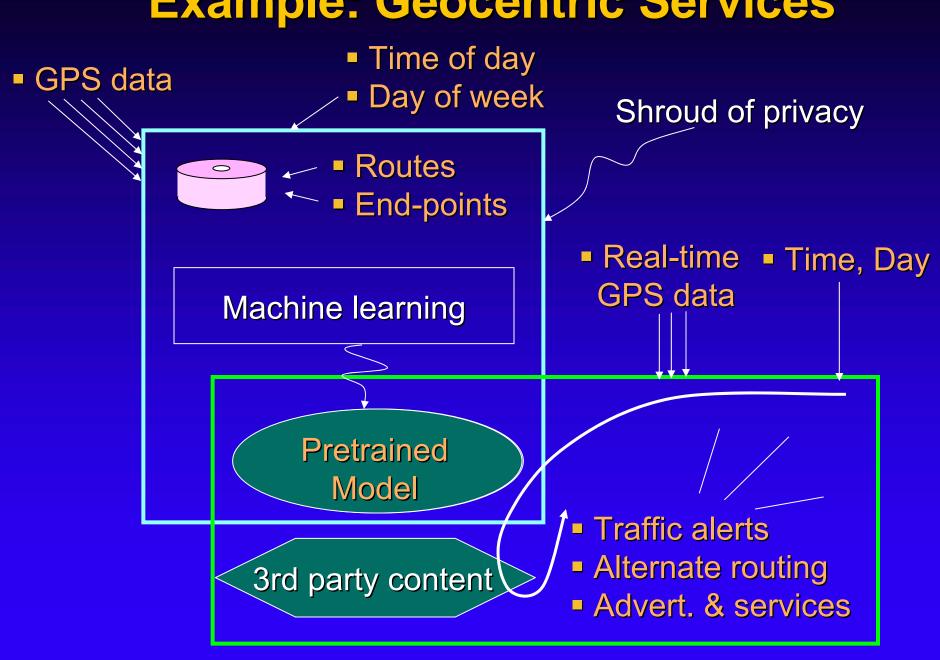

Shroud of privacy

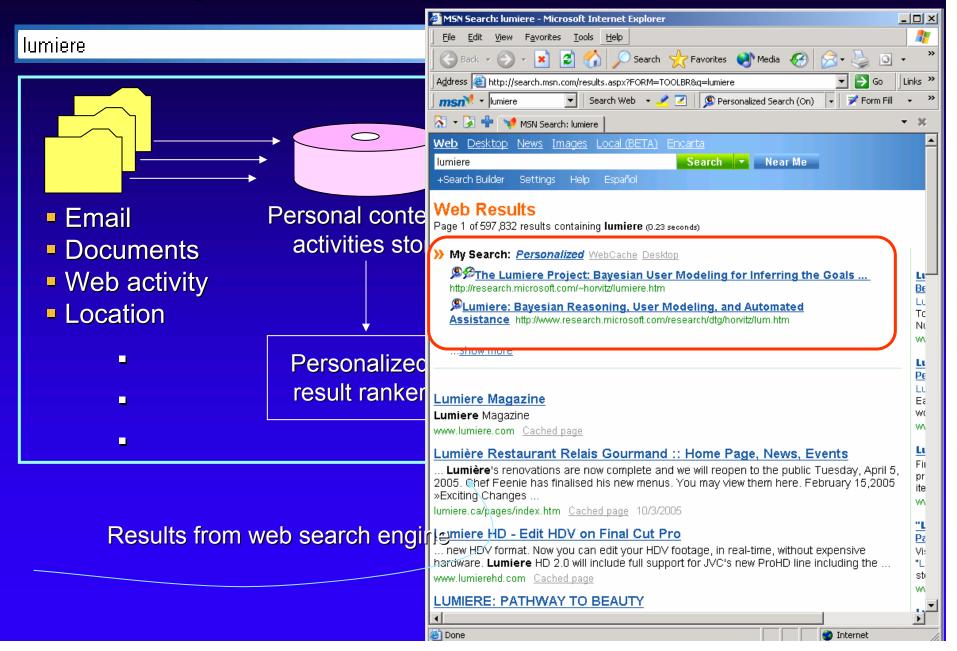

Protected Sensing & Personalization

Example: Geocentric Services

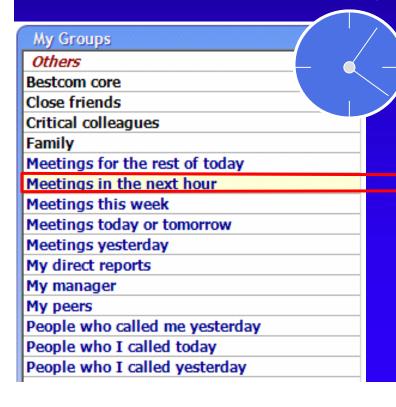

Example: Personalized Web Search

Enriched Policies for Sharing Data & Inferences

- E.g., Policies set by identity, time, and activity "If I'm scheduled to see you within an hour..."
 - You can access my exact location
 - Your calls will be routed to my cell phone
 - Otherwise no location and no call routing.

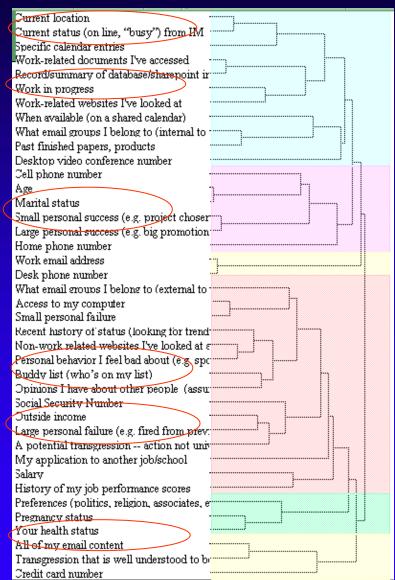

Learning Preferences about Sharing What with Whom

Variances, differences, similarities

Summary

- Efforts in artificial intelligence leading to valuable new services and applications
- Innovations in privacy will be enabling
- Al methods for learning & reasoning promises to play a key role in these innovations
