Notes: Major coal-exporting States are those with total coal exports of over 500,000 short tons.

Totals may not equal sum of components due to independent rounding.

Sources: Foreign distributions of U.S. metallurgical and steam coal by exporting State and country of destination are estimated by the EIA based upon information collected on the Form EIA-6A, Coal Distribution Report, and coal export data from COALBASE (Energy Publishing LLC, Knoxville, Tennessee). Ratios representing percentages of metallurgical and steam coal of each origin State and country of destination reported in COALBASE are applied to the EIA-6A foreign distribution national total to derive foreign distribution estimates. Estimates aggregated to the State level in this table can differ from the State-level estimates of foreign distribution in the table entitled: "Domestic and Foreign Distribution of U.S. Coal by State of Origin," which obtains all of its data from Form EIA-6A.
