

3 BILL FINE: [ I'm objecting not because of Nevada,  
4 it's a transport issue. That stuff can do anything to  
5 anyone. Get my point? That's my position. If I was going  
6 to argue against it, that would be my primary argument.

1

7 As far as being in southern Nevada, I don't  
8 know. I don't have an opinion. But that's the main  
9 reason that I don't think there should be any single  
10 repository, because of the transport issue. They can  
11 store it in place. Can't make it any simpler than that.

12 I just found out the rate payers can pay up to  
13 75 billion dollars for this thing. That's unacceptable.  
14 I'd rather see -- talk about going to Mars. That money  
15 should be spent on something else. I'd rather see  
16 somebody going to Mars.

17 I think it will be stupid if -- I told those  
18 people over there. If a Democrat is elected to the  
19 White House, this project is dead because the budget  
20 will be gone. Assuming that happens then, you've spent  
21 seven billion dollars so far, what are you going to do?  
22 He didn't think filling it in was a good idea. That  
23 would be the worst thing you could do is fill it in.  
24 Use this tunnel for something. That's on the record.]
