Comment Text :  
1 --> [Regarding the waste repository at Yucca Mountain, I have lived in Vegas for 2 1/2 years and was neutral as to its existence. However, after getting a hold of a phamplet that shows that nuclear waster and spent nuclear fuel is currently stored at 121 sites in 39 states is alarming. Are these sites equip to handle this ongoing and what about safety?

No one wants this product in their back yard but something has to be done. If Yucca Mountain is done correctly and safely it's the right step. The government can do a better job by educating the masses. ]
