1 --> [It is hard for me to believe that people are against this project. For the first time in 50 or so years the USA will have a comon place for storing spent nuclear fuel, rather than at each reactor site. What also amazes me is that people don't realize that medical and military radioactive waste is far more radioactive (and dangerous) than spent nuclear fuel. Perhaps the best way to resolve this problem would be more active education for the general public in understanding nuclear waste and the importance of this project.]
