Comment Text :

1 --> [I haven't any faith in the Department of Energy being an ex testsite worker and knowing the blatent acts of safety standards and people being contaminated and lied to; telling employees that they were safe and not contaminated when this was the furtherest from the truth. The majority of us are dieing and complete lack of any help from the government pertaining to our illness that we can not trust the DOE with Yucca Mountain and their guarantees of it being safe.]

2 [Yucca Mountain was built upon a fault line and close to an undgerground river the Amergosa. The idea of bringing rail cars through the city of Las Vegas is ridiculous! Therefore, being totally unsafe for the residents and tourists. We were never given the chance to vote on this, ie, it was just rammed down our throats. I feel that the nuclear waste should be buried in the state where it originates.] Sincerely
