Comments: [I very strongly oppose the placement of highly radioactive nuclear waste at the proposed Yucca Mtn site only 90 miles from Las Vegas. As you are certainly aware, there is clear evidence that the incidence of cancer in locations near such a dump site increases substantially. Other very serious risks are also inherent especially as regards the leakage (accidental or natural) which WILL occur.

My support and that of all with whom I have contact in the upcoming election will, certainly, be with those such as Congresswoman Shelley Berkley who oppose this travesty. There needs to be other solutions for providing income or whatever supposed benefits would be associated with this act. Please respect us, especially or children who will suffer the results of this action for many years to come.]

May God guide you to the best decision.

Thank you,

Larry Berk
