Comments: [First and foremost, I think DOE needs to extend to the public the opportunity to be heard that otherwise can not make it on these on site hearings for whatever reason. DOE should do so by adding on line live access to all these hearings.

This after all is the objective of these hearings is give the public the chance comment on the project.]

2
[Secondly, DOE needs to use the media to educate the public. Volunteer information that would enlighten the public what the repository is all about using Newspapers, television, radio and internet. I worked with the project and it is very difficult for someone looking in from outside to understand this complicated project. People inside understand it pretty well right Mr Sproat?]
