Comments: First, I appreciate what you are trying to do. I think it is a necessary "evil". I would like to know what is the probability of anything going wrong at Yucca Mountain, on a scale of 1 to 100 where 1 is a massive radiation leak to 100 What is Yucca Mountain? Please note, i am asking about probability, not possibility. Too many people like Sen. Reid and other uninformed people don't understand the difference. They ask is something possible, but not if it's probable. Virtually anything is possible, but the probability is often extremely low.]

Thanks!
