

25 DANIELLE ALLEN: 1590 Rain Dance Way, Vegas,  
1 89169. [ My comment is that I'm for nuclear power. I  
2 think we should have a lot more nuclear power. I  
3 think they should have been building nuclear power  
4 plants for the last 30 years.

5 And I know they have to store it somewhere.  
6 I don't mind them storing it here in Nevada, but I  
7 think the state of Nevada should receive compensation  
8 for it in some way from the federal government by  
9 keeping all the federal tax money in the state or  
10 build some roads. But this is a 50,000 year  
11 proposition, so it's going to have to be pretty good  
12 compensation.

13 One of the reasons why I'm for nuclear power  
14 is to save the natural gas from the power plants and  
15 that way we convert it to the cars and we get off  
16 this foreign oil dependence.] That's about it.
