

**U.S. Department of Energy Draft Repository SEIS,  
Draft Nevada Rail Corridor SEIS and Draft Rail  
Alignment EIS**

# HEARING COMMENT SHEET

RRR000350

Name: Mark Dyken

**COMMENTS:**

1 [ Nuclear waste is the most toxic & dangerous substance known to man. The transportation from all over the country to Yucca Mountain is dangerous to many people. Collecting it all to store in one place is a risky proposition, with a possibility for disaster in case of accident or earth quake.  
The waste we have should be entombed & stored on site, where it is. The best strategy would be to stop making nuclear waste.  
Do not open Yucca Mountain to Nuclear Waste Storage! ]
