Subject: No Nuclear Waste to Yucca Mountain

LSN: Relevant - Not Privileged
User Filed as: Excl/AdminMgmt-14-4/QA:N/A

1 [We have studied the hazards of nuclear waste, nuclear energy and want no part of this costly and unnecessary transport or continued building of nuclear plants at taxpayers expense. We, the American people feel we are being asked to subsidize our own demise. There is no real purpose except to enrich a few coal/nuclear/oil fossil-fuel corporate heads while the rest of us pay for something unnecessary and suicidal. Solar energy is far more suitable and deserves subsidies if we are to help the planet recover in the 10 short years remaining to clear our atmosphere. When you figure it is only 6 miles up, think of it as being the roof on a building that could quickly fill with greenhouse gases.

We must not waste time and money on moving nuclear around. We must begin today to integrate solar and other renewables into the existing grid and begin to phase out nuclear. We are also an example to the rest of the world. I believe we must remove the corporate climate obstructionists from office who would subject the rest of us to this unthinkable potential for nuclear disaster. Far worse than terrorists could have dreamed up. We expect you to think of your children and grandchildren and the fate of the earth first.]

Love, Deb Arnason, my family and friends, environmental and social justice groups around the globe
