Hi I am a concerned US citizen. Please stop dumping, or do not start dumping toxic waste in our precious sacred sites. Most of the citizens in this country do not support or desire the production of toxic waste for power of anykind, weather that is electric or war power. You should put it in the dack yards of the egos that created it. We do not want it. The resistance to this is currently spreading nationally at an astounding rate. This is not a secret. Do not dump toxic waste in our sacred sites. □

Thank you,
Jamie Corson
