1 { As a resident of the United States, I feel that it is my duty to stop the harboring of radioactive waste in Yucca Mountain. Obviously nuclear plants will continue to operate so, ather than desposing of this waste, refine it into usable plutonium, as many other countries do. Yucca Mountain has to be preserved in its natural state, and the Shoshone can use some of it as a National Park. You may think this to be a naive, but there is another way to garner money from this site. Alternative methods of recycling must be employed for this waste. }

Sincerely,
Derek Jones
