Dear DOE,  
Please - NO MORE NUCLEAR WASTE at YUCCA MOUNTAIN

1 [ Yucca Mountain is called Snake Mountain by the indigenous peoples, because of its seismic activity. Active earthquake faults run right through the site. Studies conducted on (in) the mountain have shown that canisters supposedly safe to hold radioactive wastes for thousands of years soon begin to leak radiation because the water seeping inside the mountain corrodes the canisters. Government reports about the safety of the site have been falsified. Furthermore, as it became apparent that the site was unsafe, instead of abandoning plans for the site, the safety requirements were decreased. Using this site violates a treaty our government has with the Western Shoshone people. Transport of radioactive waste from reactors all over the country would create "mobile Chernobyls" along our highways and waterways, risking the health and lives of millions of people. And on, and on, and ON. ]

We are all one people, all one world, we must stop the nuclear madness.  
It is my political priority in 2008.  
Sincerely  
Catherine Johnson
