Dept. of Energy,

[Please stop and reconsider any plans for storing nuclear waste at Yucca Mountain.
You will be advertising a rolling terrorist target if you let this plan go through.
I don't agree with the idea of storing radioactive waste in a train and potentially letting it sit
for two years. That's just down right crazy. Once the D.O. Energy takes the waste
from the suppliers it soon will become the taxpayers that foot the bill.

I am opposed to storing radioactive at Yucca Mountain. Go back to the drawing board.
Respect the Shoshone and the state of Nevada.

There are bright minds among you that know the right thing to do.]

Get it right.
