I am opposed to any further consideration of the Yucca Mtn. site as a radioactive waste repository. The concept of rail transport of such highly toxic material is flawed and very risky. Also the above ground storage presents many problems and the canisters planned will not work elsewhere if the Yucca plan fails. Finally, this remains sacred ground to the indigenous Shoshone people, and as such, should not be violated.]

Sincerely,

G.J. Billmeier, Jr., MD
