Subject: nuclear waste cleanup

LSN: Relevant - Not Privileged
User Filed as: Excl/AdminMgmt-14-4/QA:N/A

Dear policy makers and doers of supportive deeds thereto:

1 [We know that poor planning ahead and no planning ahead has always gotten civilization into trouble. We also know that putting profits ahead of life itself and living organisms in particular is not only inhumane and cruel , but ultimately self defeating even of the most greedy selves who deceive themselves and the public about the rationality of what they are doing. The rational input of Dr. Helen Caldicott among other experts on the subject off nuclear waste disposal have given us ample warnings on these matters. I hope the input of all concerned who are able to apply reason over profit concerns will give heed to them and act accordingly.] Thank You. S.Barnes
