Subject: Storing Nuclear Waste at Yucca Mountain

LSN: Relevant - Not Privileged
User Filed as: Excl/AdminMgmt-14-4/QA:N/A

15 Please do not jeopardize rivers and lands with nuclear waste in an unstable environment like Yucca Mountain. Flash flooding is common in this area and would be a real danger to nearby rivers. Leaving the waste on site is the only way to deal with it. There is no ideal or safe way to store it.

Americans do not want any more nuclear plants to be built and just want the nuclear industry to deal with the waste we already have instead of making the government do it.)
