Dear Sir,

- 1 [Yucca mountain is not a safe place to store radioactive waste. It is geologically unsound and having this waste stored there could produce disastrous results. Let's not have a Chernoble accident here!]
- 2 [Having radioactive waste travel long distances by railroad is also a dangerous thing to do. Trains can derail and there could be horrific accidents because of this.]

Please do not do this!

Sincerely,
Marian Cooley
Muncie, IN
