To whom it may concern,

I am writing to express my strong opposition to the use of Yucca Mountain for a radioactive dump site.

There is no way to ascertain the safety of storing such waste which needs to be contained for hundreds of thousands of years.

The possible contamination of ground and surface water and nearby food sources such as dairies must not be risked.

This is also a sacred Shosone site and we have violated too many agreements with Native American peoples.

I am also deeply concerned about the transportation of such waste which will need to be on our highways and railways -

I do not want that kind of hazard on the roadways where I live.

Please do not approve this ill conceived plan.]

Sincerely,

Joanne Harkins
