Hello, with all due respect:

[Please do not turn Yucca Mountain into a nuclear repository.

Yucca Mountain is sacred to the Shoshone as an herb gathering site, for rituals, and as a part of their stories. Yucca Mountain is known in Shoshone language as Snake Mountain. Indeed it looks like a snake. It is said that the snake was headed north when it froze where it is. Further more it is said that it will move again and "flip around". Geologists say that there are thirteen different fault lines running through it.

Please have respect for our native people and leave this mountain as it is.]

Thanks for your consideration.

Debbie Geno
