Subject: Statement about Yucca Mountain

LSN: Relevant - Not Privileged
User Filed as: Excl/AdminMgmt-14-4/QA:N/A

This is a statement I wish to submit about Yucca Mountain as a nuclear waste repository:

My husband and I strongly object to Yucca Mountain as a place to deposit nuclear waste. First of all, we think the US should respect the wishes of the people of Nevada, both the native people who consider Yucca Mountain a sacred site and the rest of the inhabitants.

Secondly, we have read the reports on the studies that were done on the area. Yucca Mountain seems ill-suited for such a repository, because of the many fault lines that run through the area.

Please reconsider and do not use Yucca Mountain as a place to store nuclear materials which will be radioactive for thousands of years.
