It is severely toxic (for eons), at all stages & the waste can't be safely stored. It is not sustainable & a huge waste of tax \$. Yukka is not stable by any stretch of the imagination. It would be irresponsible & ignorant to go with the Yukka non-solution.

Do your job-Protect Our Public lands, waters, wildlife & health! Your attention to this most urgent matter would be much appreciated by all present & future generations of all species.]
