Subject: Yucca Mountain not appropriate for high-level radioactive waste

LSN: Relevant - Not Privileged
User Filed as: Excl/AdminMgmt-14-4/QA:N/A

Dear Madam or Sir;

I [am writing to express my vehement opposition to the Yucca Mountain site for storage of high-level radioactive wastes. The site is far too geologically active and hydrologically permeable. Plus the danger from extensive shipment of the wastes is far too great for US population in general.

In addition, it is an abomination to further burden US taxpayers with the wastes produced by corporate business enterprise -- the producers must bear the burden.]

Sincerely, Robert A. Hamburg
